

# Move More Products More Economically with Kraft Paper Slip Sheets

**PakMake Packaging Inc®** slip sheets are a lighter, less expensive and more efficient alternative to the wood pallets they replace.

**PakMake Packaging Inc®** will work with you to redesign, add value, and optimize your process to more effectively utilize our durable slip sheets.

Can be used with or without pallet.

Kraft Paper Slip Sheet

Can be Used Box with Corner Board Packing

Can be Used Jumbo Bag Packing

## ➤ SLIP SHEET USAGE

Features	Benefits
<ul style="list-style-type: none"> <li>● Durable and puncture-resistant High tensile strength</li> <li>● Made from multiple plies of 100% virgin kraft liner board</li> <li>● Custom-designed to varying sizes, styles and thicknesses</li> <li>● Smart Environmental Choice- Made from 100% renewable forest fiber procured in accordance with SFI® standards° 100% Recyclable</li> </ul>	<ul style="list-style-type: none"> <li>● Cost-Effective- Lighter, less expensive and more efficient than the wood pallets they replace</li> <li>● Reduces storage costs by eliminating stacks of pallets</li> <li>● Reduces freight costs by increasing payload per transportation vehicle</li> <li>● Versatile- Custom-made to fit a variety of product footprints</li> <li>● Ideal for automated conveyor systems with or without slave pallets</li> <li>● Works well in manufacturing applications that are sensitive to contamination from foreign particles</li> <li>● Superior Protection- Eliminates or reduces damage caused by defective pallets—no broken boards or nails puncturing your product</li> <li>● Eliminates pallet infestation problems</li> </ul>

## ➤ SLIP SHEET TYPES

There are several types of slip sheets that can be used for the transportation of a unit load depending upon the desired use of the sheet. The slip sheet is shaped and dimensioned to the size of the product or unit load. The type of slip sheet varies depending on both the number of lip extensions and the material from which it is manufactured.

The variation used would depend on the loading patterns, unit load parameters, and desired/maneuverability of the slip sheet/unit load. Normally, the thickness of the slip sheet ranges from 0.7mm to 2.0mm:

Dimensions		
	Standard	Alternative
Length (L)	1000/1200/800 mm	Optional up to 1500 mm
Channelling (CL)	50/75/100 mm	50mm -100 mm
Width (W)	1000/1200/800 mm	Optional up to 1500 mm
Channelling (CW)	50/75/100 mm	50mm -100 mm

Dimensions	
Thickness	Pulling Strength
0.8 mm	Up to 800 kg
0.9 mm	Up to 1,200 kg
1.0 mm	Up to 1,500 kg
1.2 mm	Up to 1,900 kg
1.5 mm	Up to 2,200 kg
1.8 mm	Up to 2,700 kg
2.0 mm	Up to 3,200 kg

## ➤ Figure 1.1: Types of Slip Sheets

### ADVANTAGES

- light
- hygienic
- wood-free
- 100% recyclable

### SAVE ON

- materials
- freight
- handling
- warehousing

The thickness of the slip sheet is dependent on the paper substance combination:

**Sustainable packaging is your contribution to the environment**

## ➤ ADVANTAGES

### Advantages of Slip Sheets

- Using slip sheets instead of wooden pallets allows for 12–15% more products in material handling containers.
- Slip sheets do not require maintenance and can easily be replaced.
- Significant reduction in material handling costs.
- Decreases loading/unloading time by up to 60%
- Weighs 1/20 as much as wooden pallets, reducing shipping costs.
- Can be customized to fit any size load.
- Eliminates the need for pallet exchange.
- Reusable and reliable.
- 100% recyclable.
- Is cost-effective.
- Unlike wooden pallets, slip sheets are not subject to phytosanitary restrictions

## ➤ MORE ABOUT SAVINGS

You can save a bundle when you make the change from wooden pallets to Slip Sheets: the cost of materials alone drops so significantly that any company should consider this option.

- Savings on material costs can be 80% or even more when compared to wooden pallets.
- Better use of space in containers and vehicles will reduce transportation costs.
- Slip Sheets are very light, which means major savings on air freight!
- Minimum space is required for storage of the sheets, thus reducing warehousing costs:

1,000 Slip Sheets = 1 m<sup>3</sup>

1,000 pallet = 70 m<sup>3</sup>

With Slip Sheets, you will have 100% recyclable and hygienic transfer sheets for different conditions. Not only is this option good for your company's bottomline, but environmental thinking will also be good for your corporate image!

## ➤ Figure 2:2

### Ship Products, Not Pallets

Load more products in standard shipping containers.

## ➤ DISADVANTAGES

### Disadvantages of Slip Sheets

- Large start-up cost. Push-pull forklift attachment cost RM....
- Need customer participation. Customers must have push-pull attachment to move goods on slip sheets. Slip sheets must be placed on rackable pallets

## ➤ Figure 3:3

Push-Pull Attachment

Supplied by: Cascade (USA/INDIA/UAE)

## ➤ PUSH-PULL CONVENIENCE

Fully compatible with dedicated push- pulls or standard forklifts outfitted with an easy-to-install push-pull attachment. Each high tensile strength slip sheet features a pull-tab on one or more sides to allow gripping of the load.

(A) Reach

(B) Grip

(C) Pull

(D) Lift

(E) Level
